Microsoft Dynamics NAVHR 2009 – 2009 - 2011

The biggest news on Dynamics NAVHR 2009 is the Role Tailored (RTC). RTC is designed to help users focus on their tasks by tailoring their application experience to the needs of their role.

Microsoft Dynamics NAVHR 2013 – 2012 - 2014

The Role Tailored experience will be maintained. There will be several improvements on integration with other Microsoft platforms such as Microsoft Office e SharePoint. SharePoint will be used to exposed most features of NAVHR, allowing for user to access NAVHR using a Browser.

On a technological level, Microsoft SQL will be the only database system allowed to work with NAVHR and development environment will have several improvements. On the reporting area, all reports will be developed exclusively in Microsoft Reporting Services.

Microsoft Dynamics NAVHR "8" – 2015 - 2016

Development environment will be exclusively based on .net, as well as the runtime clients. C/AL development environment will be discontinued. There will be several improvement on core functionalities mainly directed to mobile devices.

Microsoft Dynamics NAVHR "9" – 2017 - ...

NAVHR will follow Microsoft Strategy, on every new major release, improving customer experience on areas such as:

- Productivity
- Collaboration
- Mobile integration
